Hearing Session

Provision of the Local Plan

Grantown Additional ENV

Summary of objection(s)

The fields around Revoan are not allocated as Environment, as they were in the draft Local Plan.

These are fairly wet fields and are valuable for a variety of biodiversity. They are also important in the landscape of Grantown, contribute significantly to the landscape surrounding the caravan park, and provide habitat continuity and permeability with Beachen Wood.

These fields contribute positively to the 1st, 3rd and 4th aims.

Recommendation.

The fields around Revoan are allocated as Environment
