

## Welcome to Ballater

Ballater, renowned for its Royal connections lies on a meander of the River Dee under the shelter of Craighendarroch. As you will see, Ballater is a very attractive village that has helped put the 'Royal' into Royal Deeside. Ballater is the nearest settlement to, and was the railhead for, Balmoral Castle, which lies eight miles along the River Dee to the west.

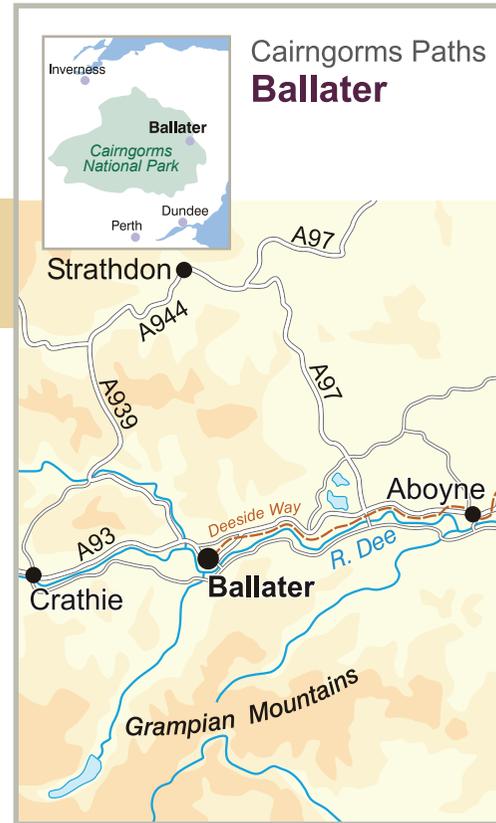

## Ballater Paths

A network of paths and tracks lead out of the village, providing a variety of routes to enjoy with fine views, a rich local history and abundant wildlife. This leaflet suggests 5 routes of varying length, all starting and finishing in Ballater so you can give the car a rest! Each colour-coded route is shown on the map and there are corresponding coloured waymarkers along each route to help guide you. However, please take a few minutes to read the route descriptions on the map before you set out, just to make sure that your chosen route is suitable for you and others in your group.

## Explore Deeside

## Deeside Way

An attractive walk following the old Deeside railway, with fine views of the River Dee and surrounding hills. The Aboyne and Deeside Railway Company wanted to build the line through to Braemar but Queen Victoria was 'not amused' and said no! So the railway line ended at Ballater but this stretch of trackbed is a reminder of the original plan.

## Cambus o' May Suspension Bridge

Six kilometres to the east of Ballater lies the picturesque suspension bridge over the River Dee, a short walk from the small car park just off the A93. The site is a great place for a picnic and has wonderful views up and down the river.

Walkers, cyclists and horse riders from Ballater can get to both the Cambus o' May suspension bridge and the forest walks by following the Deeside Way as shown on the map below.

## The River Dee

The source of the Dee is about 4,000 feet high on the side of Braeriach, one of the highest of the Cairngorm Mountains.

Famous as a great salmon river, the Dee tumbles past Ballater on its way to Aberdeen giving the river a total length of 85 miles.

All of the paths in this leaflet either pass close to the river or give you more distant views. Be sure to watch for salmon leaping as they feed or make their way up the river.
