

# Cairngorms National Park Local Development Plan **Action Programme** **June 2017**

---

## SECTION I: PURPOSE AND FORMAT

### Purpose

This Action Programme has been prepared to support the delivery of the Cairngorms National Park Local Development Plan 2015 (LDP). It identifies the actions which will help implement the vision, strategy and proposals of the LDP. It is the Cairngorm National Park Authority's (CNPA) main delivery tool for the LDP and will be used to help monitor progress.

The Town and Country Planning (Development Planning) (Scotland) Regulations 2008 requires Action Programmes to set out:

- A list of actions required to deliver each of the Plan's key policies and proposals;
- The organisation who is to carry out the action; and
- The broad timescale for carrying out each action.

However, Action programmes are now being promoted as a key tool for facilitating and supporting development delivery. Scottish Planning Policy (2014) emphasises that 'Action programmes should be actively used to drive delivery of planned developments: to align stakeholders, phasing, financing and infrastructure investment over the long term' (para. 31).

In addition, the Scottish Government has also produced draft [Planning Delivery Advice for Housing and Infrastructure](#) (2016) which specifically includes guidance for Action Programmes. As a result, the preparation of this Action Programme has included consulting with relevant bodies to include greater information about infrastructure requirements and constraints which may affect the delivery of sites.

The CNPA want this Action Programme to be a 'live' document that changes and adapts over time. The CNPA will review and publish a revision of it each year in order to reflect changes on the ground, demonstrate progress or problems in delivery, incorporate new actions and provide up to date information on the status and progress of sites over time for communities and developers.

The CNPA will also use the Action Programme to build a clearer evidence base for each of the allocated sites in the LDP, identifying constraints, or costs of developing sites and ways of resolving them. That information will be updated in each review of the Action Programme and available for developers and communities.

### Format

The Action Programme has six main sections:

Section	Page
<b>1. The Purpose and Format</b>	<b>1</b>
<b>2. Delivery Priorities for the year ahead</b>	<b>5</b>
<b>3. National Projects</b>	<b>8</b>
<b>4. Infrastructure Delivery and other Projects</b>	<b>11</b>

## The role of partners

The Action Programme is prepared by the CNPA as the authority that prepares the Local Development Plan for the National Park. However, the CNPA is only one of many public bodies, private developers, landowners and communities who are responsible for delivering actions within it.

For example, most local authorities combine the roles of planning authority with housing authority, roads authority, education authority and delivery of services, each of which may help deliver the LDP for an area. In the Cairngorms National Park, the local authorities continue to do all those roles, with the CNPA sharing parts of the planning authority role. This means that our Action Programme relies heavily on the work of the local authorities and other public bodies as well as the owners of land, private developers and communities. There are too many to identify in detail, but some of the key roles are summarised below:

### Summary of partner roles

Partner	Responsible for:
<b>Cairngorms National Park Authority</b>	<ul style="list-style-type: none"> <li>• Coordination of delivery, monitoring and review of LDP and Action Programme.</li> <li>• Significant planning consents, monitoring and enforcement, delivery of efficient planning service for customers</li> <li>• Support and small-scale funding for corporate priorities</li> </ul>

### Links to other Plans and Strategies

The Local Development Plan and Action Programme help to deliver the plans and strategies of many organisations and for many issues across the National Park. In particular, the Cairngorms National Park Partnership Plan sets the context for the LDP and is the plan that coordinates the work of many partners in the National Park. The implementation of the LDP and Action Programme contribute to many of the Partnership Plan's outcomes and programmes. Other plans or strategies prepared for the Cairngorms National Park that will also support the implementation of the LDP include:

- National Park Economic Strategy
- The National Park Capital Investment Plan
- Tourism Action Plan for the Cairngorms National Park
- Cairngorms Nature Strategy and Action Plan
- Core Paths Plan

Other plans and strategies that are closely linked include:

- The local authorities' Housing Strategies, and Strategic Housing Investment Plans
- Regional Transport Strategies
- Area Waste Plans
- Local Authority capital investment plans
- Community Action Plans
- Plans of Community Planning Partnerships
- Catchment Management Plans

### Review of the Action Programme

The CNPA will review and republish the Action Programme annually. We expect the Action Programme to evolve over the life of the LDP as it is implemented, as sites move forward, and partners focus work around the Action Programme.

## SECTION 7: DEVELOPMENT LAND SUPPLY

This section of the Action Programme is used to assess progress and identify constraints or barriers to development of land and sites for housing, employment and community or other uses.

This section includes current allocations (identified as ‘H’ sites) as well as existing permissions (identified as ‘EP’ sites). Some sites have planning permission that has been granted over 3 years ago, however in many cases these have been implemented through the starting of construction or servicing of sites.

### *Infrastructure requirements*

Each site has also been assessed in respect of flooding, roads, water & drainage, electricity and education under the infrastructure requirements heading. These have been informed through consultation with the relevant authorities and each site has been colour coded to reflect its level of constraint.

	No significant infrastructure constraints affecting delivery of the site.
	Moderate constraints or further assessment required to determine the extent of constraint. Appropriate mitigation measures required.
	Significant infrastructure or other constraints that will make the development undeliverable.
