

Tread Lightly in the Park

It only takes one match... ...campfire or BBQ to cause a wildfire.

Do not light a campfire

The forests, woodlands and peatlands of the Cairngorms are internationally important. You can help protect this special landscape by using a camping stove instead.

Follow all on site signage and advice from rangers. If it is safe to have a barbeque place foil trays on a solid, fire resistant surface such as stones, sand or shingle. Take the foil tray home or dispose of it safely in a bin.
